

Hello-

First I would like to thank the Federal Aviation Administration (FAA) for taking these steps to require reports on animal incidents during airline flights. I understand that the FAA is ready to create a rule which would require airlines to file monthly reports on incidents involving animals and to make this information available to the public.

Next I urge the FAA to finalize their rules for submitting these reports just as soon as possible.

I do have big concerns regarding the number and type of animals that this ruling covers. I understand that right now only pets of U.S. families are covered. I ask the the FAA please define "animal" more broadly. Please allow this ruling to cover all animals who undergo transportation by the airlines industry.

Thanks for taking the time to read this transmission.
